Israel Moves To Take Control Over the Federal Reserve

The totally corrupt anti-American Obama regime is trying to appoint the head or former head of the Israeli Central Bank as the Vice Chairman of the Federal Reserve. The scuttlebutt is that Obama has been paid tens of millions of dollars to deliver the US Federal Reserve to Israel's control. I don't know whether to believe this or not, but considering the corruption of all sectors of the US government, I would not be surprised by anything. In Washington there is nothing that cannot be bought. You can read about it here and make up your own mind: <http://wallstreetonparade.com/2014/03/fed-nominee-stanley-fischer-has-a-citigroup-problem/> ^[1] Don't expect any honest reporting from the prostitute media. Obama, of course, will lie through his teeth, and so will the media. Whatever the truth turns out to be, it will be the opposite of the Obama regime's explanation.
