► The DJ-AIGCI family includes

nine sub-indexes that group commodities based on type (e.g., the Grains sub-index which includes Corn, Soybeans, and Wheat).

DJ-AIGCI sub-indexes are tools that can help investors in benchmarking their portfolios to over- or underweight specific groups of commodities.

In addition, the Energy, Ex Energy and Agriculture sub-indexes can help investors to “fine tune” the level of energy and non-energy commodities in their portfolios.

The family of indexes also consists of single commodity indexes on all of the components currently part of the DJ-AIGCI, plus cocoa, in excess and total return versions. The 1, 2, and 3 Month Forward versions of the DJ-AIGCI allow investors to measure exposure to longer-dated commodity futures contracts.

► DJ-AIGCI Currency Versions

Yen, Euro, Swiss Franc and Pounds Sterling denominated versions of the DJ-AIGCI and the DJ-AIGCITR are also available.
